Also, stain and paint colors shown on products in this catalog may vary due to the catalog printing process. Similarly, we reserve the right to make minor changes and improvements other than what is shown or described in this catalog.

Care Instructions

Care of your newly purchased hardwood furniture is very simple. Solid hardwood resists marring and scratching. The protected natural fibers in the hardwood may swell or shrink slightly from season to season. Extremely dry conditions will cause the grain to open, or if used in a damp environment, you may notice a swelling or warping. Direct exposure to sunlight over a long period may change the color of your wood. Exercise care to avoid these extremes in humidity, dryness, or brilliant sunlight, and your furniture will remain beautiful for many years!
